

Technology transfer proposal BSBF2024

Call for partnership

GSI/FAIR Digital Open Lab

- GSI/FAIR's high-performance computing centre "Green IT Cube" houses the "GSI/FAIR Digital Open Lab", an open lab for partners in industry and research provides the environment for developing, testing and upscaling energy-efficient high-performance computing to the scale of industrial demonstrators.
- The lab offers
 - resources to adapt and test innovations, including HPC, data center, AI expertise, efficient hardware, and IT consultants.
 - an innovation ecosystem to develop, test, and validate concepts under real-world conditions, enabling large-scale testing and collaboration with other research partners.
 - flexibility for large projects and prototype testing.
