Fusion Technology Transfer Award

Fusion Technology Transfer Award promotes the use of fusion technologies in non-fusion applications with a 10.000€ prize. European companies and organizations implementing fusion technologies in non-fusion markets can apply.

The contest is open to European companies and organizations presenting a project where a fusion technology or know-how is used or is planned to be used in a non-fusion environment. Fusion for Energy (F4E) will grant a sole prize of 10,000 € (VAT exempt), managed by Viromii Innovation SL (VIROMII).

The evaluation criteria are based on the socio-economic impact of the project and the efforts made by the applicant to achieve the commercial use of a fusion technology in a non-fusion market.

The application period runs from September 16th, 2024, to November 15th, 2024, and it is open to entities registered within F4E Member States.

Relevant information:

- Open to **entities registered within F4E Member States** presenting a project where a fusion technology or know-how is used or is planned to be used in a non-fusion environment.
- **10.000 € prize** for one project.
- **Application period:** from September 16th to November 15th, 2024
- **Evaluation criteria:**
 - Socio-economic impact of the project
 - Efforts made by the applicant to achieve the commercial use of a fusion technology in a non-fusion market.
