

RADIOLOGIC – PLC Logic networks made easy!

(Yes it's safe, wireless and standalone!)

RADLOIOGIC (RL)

A modular; multi-interface, standalone PLC radio system with a range of up to 1000 meters.

Connect, Configure, Run!

RL radio modules offer exceptional flexibility, supporting various interfaces, from BUS systems to digital.

Installation is quick and easy due to its user-friendly PLC touch display and transmitters.

Connect the input/output and power supply, communication is entirely wireless which saves time, money, and reduces environmental impact!

Proven Technology!

RADIOLOGIC, in industrial and scientific facilities i.e.;

- **Daphne Technology** Research Facility: Utilizes multiple RL modules for their ease of programming and data collection
- **LKAB** Iron Ore Mining: Since 2012, RL DISPLAY and RL PRIO have been used to control all ore-loading trucks and heavy discharge systems.
- **PAAB** (Process Automation and Measurement Experts) RL modules replace cables and manage measurement control systems in drinking water treatment, distribution, and industrial facilities.
